Education

York University
Bachelor of Science in Computer Science

Sept 2021 – Expected Apr 2026
Toronto, ON

Experience

TD Bank Fall 2025 – Present
Software Engineer Co-op (DNA Support – E-Reporting/CMOD) Toronto, ON

- * Executed the CyberArk passphrase rotation across multiple testing environments and Production, including validating PGP file encryption/decryption and performing post-deployment checks.
- * Built scripts to identify all server scripts with hardcoded credentials, including those triggered by Autosys jobs, and supported their remediation.
- * Updated affected scripts to dynamically retrieve passphrases via CyberArk checkout instead of using hardcoded values.
- * Resolved incidents and service tickets and performed CMOD server recycle operations to support testing and ingestion workflows.

Checklick Apr 2025 – Aug 2025
Software Developer (Freelance) Toronto, ON

- * Implemented responsive web pages using React.js and Tailwind CSS based on designs from Zeplin.
- * Collaborated with designers to ensure UI accuracy and cross-browser compatibility.
- * Maintained clean code and version control using Git and GitHub.

Draw Dream Feb 2025 – Apr 2025
Software Developer (Freelance) Toronto, ON

- * Built an interactive coding platform using React.js, TypeScript, and MySQL for user progress tracking.
- * Integrated front-end and back-end components with a focus on performance and scalability.
- * Applied UI/UX best practices to create engaging learning experiences.

Projects

Online Banking System | Java, Spring Boot, Angular, HTML, CSS, JavaScript

- * Built a secure and responsive online banking platform with features such as account management, transactions, and loan services.
- * Led front-end development using Angular and developed a robust backend with Spring Boot and MySQL, ensuring reliable and secure API interactions.
- * Implemented modules for customer operations, secure login, and seamless data handling across all application components.

Social Media Sentiment Analysis Dashboard | Python, Flask, React.js, SQLite, NLTK, TextBlob, BERT, Material-UI, Chart.js

- * Developed a real-time sentiment analysis system that scrapes Reddit posts and analyzes public opinion using multiple NLP models (VADER, TextBlob, BERT) with emotion classification capabilities, supervised by Dr. Aijun An.
- * Built a comprehensive web dashboard with interactive visualizations including sentiment distribution charts, word clouds, and cross-model comparisons using React.js and Material-UI components.
- * Implemented RESTful API endpoints with Flask backend, SQLite database with session tracking, and responsive frontend with 6+ chart types for real-time data visualization and analysis.

Technical Skills

Languages: Java, Python, C/C++, SQL (MySQL, SQLite), JavaScript, HTML/CSS, Shell Scripting, Linux/Unix,
Frameworks & Technologies: React.js, TailwindCSS, Angular, Spring Boot, Flask, REST API, JUnit, Git, GitHub
Tools & Platforms: VS Code, Eclipse, IntelliJ, PyCharm, CLion, WebStorm, Tableau, Figma, Excel, Vite
Libraries: Pandas, NumPy, Matplotlib, Seaborn, NLTK, TextBlob, HuggingFace Transformers, Chart.js, D3.js
